

BICYCLE AND PEDESTRIAN CONNECTIONS

The Genesee Transportation Council is funding a Route 364 Corridor Study. This study will identify potential pedestrian and cyclist improvements to East Lake Road. According to the Unified Planning Work Program (UPWP) application for funding, "Particular focus will be the corridor between Ontario County's two parks on Canandaigua Lake - Ontario County Beach Park and Deep Run Park, and Town of Gorham parkland." Bicycle and pedestrian enhancements connecting these properties will increase access to the parks as well as Canandaigua Lake.

TRAFFIC CALMING

The four way intersection at Ridge Road with a high visibility crosswalk would reinforce the connection between the two parks in a way the 2015 plan wouldn't. The traffic suggestions shown to the left would further enhance connections, as well as improve safety for roadway users.
