## What is Ignition Interlock?

An ignition interlock device connects to a motor vehicle ignition system and measures the alcohol content in the breath of the driver. The device prevents the vehicle from being started until the motorist provides an acceptable breath sample below NY's set-point of .025%.

The device records and transmits the following:

- ⇒ Attempts to start the vehicle
- ⇒ The alcohol level of the individual
- ⇒ The alcohol level at during vehicle operation
- ⇒ Attempts to bypass the device
- ⇒ A picture of the individual taking the test
- ⇒ The location of your vehicle.

## FREQUENTLY ASKED QUESTIONS

**Q: When do I have to have the Ignition Interlock Device installed?**

**A:** You must have the device installed within 10 business days of the condition being imposed by the Court.

**Q: Will it damage my car?**

**A:** No, it is connected to the wiring of the vehicle under the dash and hood. At de-installation, the wiring is returned to its original condition.

**Q: Who pays for the device?**

**A:** You pay for all the related costs unless the court grants a waiver or reduction of fees.

**Q: How often does it need service?**

**A:** Every 30-60 days, possibly more frequently if there are violations.

**Q: What if I live outside of Ontario County or New York State?**

**A:** An out-of-county or out-of-state resident must comply with a New York ignition interlock device order.

**Q: What if I have more than one vehicle?**

**A:** You may not operate any vehicle without an Ignition Interlock device. You must install a device on any vehicle you own, have registered, have title to or operate. \*\*If you have a motorcycle registered and/or titled in your name, it MUST be transferred out of your name or you will be returned to Court.
