Ontario County Ignition Interlock Program Instructions for Defendant With a Vehicle(s)

As a result of your conviction, you must have an Ignition Interlock Device (IID) installed on any vehicle you own and/or operate (**any vehicle registered and/or titled to you**) within ten (10) business days. YOU CANNOT OPERATE A MOTOR VEHICLE WITHOUT AN INTERLOCK DURING THOSE TEN DAYS!!!!!!!!!!!!!!!

Please take the following steps in order:

STEP #1:

As soon as possible, and no later than three (3) business days from sentencing, you must phone and register with the Ontario County STOP-DWI Office at 585-396-4308. When you call, if you receive the voicemail recording, please leave your name, phone number, and date and court that you were sentenced in. (You may then proceed to step #2)

STEP #2:

Within ten (10) business days, you must have the ignition interlock device (**Class II**) installed in your vehicle(s). The addresses and phone numbers of all approved providers can be found below. You may choose any provider in accordance with the list. Once you have decided which provider you would like to use, contact their customer service number (provided below) to set up an account. The provider will then schedule your installation appointment at a local shop.

- ⇒ **ALL** individuals required to install an Ignition Interlock device, whether on a Probation sentence or a Conditional Discharge, are required to install a **Class II** device (which has a camera and GPS system).
- ⇒ Once your device has been installed, the provider will send STOP-DWI a Certificate of Installation. The STOP-DWI Office will handle all Certificates of Installation and will contact the sentencing Court if one is not received (due to failure to install). You do NOT need to send a copy of your certificate to the Court and/or STOP-DWI.

You may choose either company from the list below. Each company uses an area installer but the account must be set up by calling the company first. They will direct you to a local installer. You may want to contact both companies so that you can compare prices and service locations. When getting pricing, be sure to ask about ALL related costs including, but not limited to, installation recalibration and de-installation.
